

ANALYSIS OF ORIGINAL BILL

Franchise Tax Board

Author: Zettel Analyst: Marion Mann DeJong Bill Number: AB 110
Related Bills: See Legislative History Telephone: 845-6979 Introduced Date: 01/18/2001
Attorney: Patrick Kusiak Sponsor: _____

SUBJECT: Manufacturers' Investment Credit/Increase Percentage To 9%

SUMMARY

This bill would increase the Manufacturer's Investment Credit (MIC) from 6% to 9% of the cost of certain property used in manufacturing and make minor technical changes.

PURPOSE OF THE BILL

According to the author's staff, the purpose of the bill is to increase the incentive for manufacturing businesses to remain or locate in California.

EFFECTIVE/OPERATIVE DATE

As a tax levy, this bill would become effective immediately upon enactment and would be operative for taxable years beginning on or after January 1, 2001.

POSITION

Pending.

ANALYSIS

FEDERAL/STATE LAW

Existing state and federal laws allow a taxpayer to deduct expenses paid or incurred in the ordinary course of a taxpayer's business and allow a depreciation deduction for the obsolescence or wear and tear of property used in a business or for investment property.

Existing federal law does not have a credit comparable to the MIC.

Existing state law allows qualified taxpayers a credit, known as the MIC, equal to 6% of the amount paid or incurred after January 1, 1994, for qualified property that is placed in service in California.

Date

Gerald H. Goldberg

02/13/01

For purposes of the MIC, a qualified taxpayer is any taxpayer engaged in manufacturing activities described in specified codes listed in the Standard Industrial Classification (SIC) Manual, 1987 edition. Qualified property is any of the following:

1) Tangible personal property that is defined in Section 1245(a) of the Internal Revenue Code (IRC) and used primarily:

- for manufacturing, processing, refining, fabricating, or recycling of property;
- for research and development;
- for the maintenance, repair, measurement, or testing of otherwise qualified property;
or
- for pollution control that meets or exceeds state or local standards.

2) The value of any capitalized labor costs directly allocable to the construction or modification of the property listed in #1 above or for special purpose buildings and foundations listed in #3 below.

3) For certain taxpayers engaged in specified SIC Code activities, special purpose buildings and foundations.

For taxpayers engaged in computer programming and computer software related activities, qualified property includes computers and computer peripheral equipment used primarily for the development and manufacture of prepackaged software, and the value of any capitalized labor costs directly allocable to such property.

The MIC explicitly excludes certain types of property from the definition of qualified property, such as furniture, inventory, and equipment used in an extraction process.

THIS BILL

This bill would increase the MIC from 6% to 9% of the qualified cost of qualified property placed in service in taxable years beginning on or after January 1, 2001. The 2% increase would not apply to MIC carryovers.

This bill also would make minor technical changes to delete obsolete language referencing the low-emission vehicle credit and change "which" to "that" in various places.

IMPLEMENTATION CONSIDERATIONS

Implementing this bill would not significantly impact the department's programs and operations.

LEGISLATIVE HISTORY

AB 2461, Runner, (1999/2000) would have increased the MIC from 6% to 8% of qualified costs. AB 2461 was held in the Assembly Revenue and Taxation Committee. **AB 1062, Battin, (1997/1998)** would have increased the MIC from 6% to 8% of qualified costs. AB 1062 was also held in the Assembly Revenue and Taxation Committee.

OTHER STATES' INFORMATION

New York provides an investment tax credit (ITC) to manufacturers for depreciable equipment or buildings that have a useful life of four years or more. The equipment must be located within the State and be used principally for the production of goods. The credit is 5% of up to \$350 million of qualified expenditures and 4% for qualified expenditures in excess of \$350 million. Certified pollution control, industrial waste treatment, and acid rain control facilities also qualify for this credit. Eligible costs also include those associated with retail enterprise investments in qualified rehabilitated buildings. Research and development (R&D) property may qualify for an optional rate of 9%.

Illinois provides a replacement tax investment credit equal to 0.5% of the basis of qualified property used in Illinois by a taxpayer primarily engaged in manufacturing, retailing, coal mining, or fluorite mining.

Massachusetts provides a 3% credit based on the cost of qualified property used for manufacturing, farming, fishing, or research and development.

Michigan provides a graduated investment tax credit based on adjusted gross receipts of a firm. The credit is a percentage (0.85% to 2.3%) of the net costs of qualifying tangible, depreciable assets located in Michigan.

FISCAL IMPACT

This bill would not significantly impact the department's costs.

ECONOMIC IMPACT

REVENUE ESTIMATE

Based on the discussion below, the revenue loss from this proposal is as follows:

Effective Beginning January 1, 2001 Enactment After June 30, 2001 Fiscal Year Impact (In Millions)		
2001-02	2002-03	2003-04
-\$105	-\$130	-\$135

This analysis does not consider the possible changes in employment, personal income, or gross state product that could result from this proposal.

REVENUE DISCUSSION

This estimate is based on a microsimulation model of California tax returns and grown to approximate year 2001 and beyond. The credit use rates taken from the model were then applied to derive the aggregate credit use. The fiscal year cash flow patterns are based on the department's analysis of how manufacturers adjusted their tax payments to reflect the reduction in liability resulting from the current law MIC.

ARGUMENTS/POLICY CONCERNS

This bill would provide an increased incentive for qualified property that is purchased pursuant to a binding contract entered into prior to January 1, 2001, but placed in service in a taxable year beginning on or after that date because any qualified costs paid pursuant to that contract would qualify for the increased credit rate provided under this bill.
